## NET ASSETS OF U. S. COMPANY

Its Centennial-Eureka Mine Has Sixty Million Dollars in Two Shoots.

TWO MILLION TONS IN THEM

FIGURES DEAL WITH ONLY POR-TION OF MINE.

tement published in Boston the figures were given that purbe an approximate reflex of the soft the United States Mining The company's Centennial-roperty in the Tintic district, was figured at \$10,000,000 and assets were given as being \$22. In a statement published in Boston the other day figures were given that pur-ported to be an approximate reflex of the net assets of the United States Mining ureka property in the Tintic district,

Eureka property in the Tintic district, this state, was figured at \$10,000,000 and the total assets were given as being \$22.509,000. Looks big, doesn't it? But listen. According to estimates that have been recently complied and from a source that may be considered competent, the figures given in Boston and which have since been allowed to go unchallenged, fade into significance by comparison.

One single shoot of ore in the Centennial-Eureka mine, that in what is known as the west fissure, is estimated to contain between the 600 and 1,200-foot levels alone approximately 1,000,000 tons of ore of, an average value of \$40 per ton. This would give this one shoot a value of \$40,000,000, or nearly double what the entire net assets of the company are figured at in Boston. So far as developed this shoot has a known width of more than 200 feet, but its real thickness beyond that point is understood to be a supervised to the company and the state of the company are figured at the company are

But that is not all. In the east fissure of the property there is another 1,000,000 cons of ore practically blocked out, which has an established value of \$20 per ton or \$20,000,000. From one of the levels it this fissure a winze has been sunk fot 520 feet in ore which, it is claimed, averages 12 ounces in gold, or practically \$240 per ton. The extent of this shoot is unknown other than as the winze shows The same kind of ore is found on alsides and in the bottom of the winze and it, therefore, seems as though the shoot would prove to be a most important one. So diversified are the wonderful riches of this mine that rich ore is found in most unexpected places. It is said that the event of the said that the enterpress of the said that the said

Figures Are Not Exaggerated.

Vigorous Campaign Ahead.

understand," said The Herald's i at a producing rate of 1.000 tons daily. At the present rate of production the known reserves cannot be taken out in ten years and, a year from today, it is safe to say that more than twenty years' reserves will be in evidence.

STOPING ORE AT DALY.

Mazeppa Ledge Opened and Extrac-

tion is Now to Begin. The report comes from Park City that active stoping operations are to be inaugurated in the Mazeppa ledge of the Daly Mining company within the next few hours. After the vein had been drained and its dip was determined by the raise made from the Federal tunnel several weeks ago, Superintendent Quinn started a cross-cut for the purpose of opening the ledge on the tunnel level. That work, the report from camp states, was finished a few days ago and, because of his inability to secure the right kind of a crew at the moment, Superintendent Quinn, who also has the development of the Naildriver on his hands, moved his entire crew from the Daly to the Naildriver to get the work started. By tonight or comorrow, according to the report, he will have selected his crew for the Naildriver, and then his regular force will be transferred back to the Daly for the purpose stated.

While no intimation of what conditions are where the vein has been opened has been allowed to creep out, the fact that miners are to begin opening stopes carries with it the remaining fact that there is ore to stope, and the belief is that there is lots of it. eport comes from Park City that

MONTGOMERY-SHOSHONE.

Ranches Being Purchased and Big

Waterworks Going In.

Having worn off the effects of his rather hard trip into the Bullfrog country, Nevada, George A. Black of the Montgomery-Shoshone directorate vosterday explained the business that the company's official household had on hand an the time of his call to camp.

"The business that will have more will be interest than anything else." said Mr Black. "was the decision of the directors of the company to purchase several pieces of ranch property about four miles above Beatty, on the Amargosa river. The acquisition of this property is to be immediately followed by the sinking of shafts into the underground current of the stream and the installation of a waterworks plant and the conveyance of the water through a ten-inch steel pipe line to Beatty. This enterprise calls for the outlay by the Montgomery-Shoshone company of \$75,000 to \$700,060, and the entire proposition is to be rounded out by the first day of next July.

"The Amargosa river, so-called, is a subterranean stream from 150 to 200 feet wide. Very little of the water finds its way to the surface but the stream can be tapped at fifteen to fifty feet deep anywhere in the section where the company is purchasing its water rights and ranches. The water is good and there is, apparently, an inexhaustible supply of it. By the time we get the water out and piped to Beatty the company will have had its mines sufficiently developed and the necessary tests made to warrant the received of a mill, and that will be done next year. We expect to make the mine supply every dollar with which to carry out these undertakings during the regular course of development. In fact, we know that it can be depended upon to do it.

"Just to give you an idea of what the mine shows today I will state that a Waterworks Going In.

## STOCK MARKET

But There Isn't Any Great Rush to Invest.

DIVIDENDS CUT NO FIGURE

ACTION HAD BEEN DISCOUNTED BY THE "STREET." New York, July 20.—Stock brokers re-garded the moderation in the heat as an important development and to this was attributed in no small part the closer. attributed in no small part the change from the extreme apathy of the market. The increase in interest proved to be amongst the sellers and prices suffered accordingly. In addition to the change in the weather there were some developments of importance in financial affairs. eclaraton putting that stock on a 5 per ing 4 per cent rate. This action was no surprise and has been confidently expected for weeks. The response of the market to the news was watched, however, with keen attention to form a judgment of how far existing prices have already discounted expected lavorable developments. It had been hoped that a considerable influence would remain with actual increases made in dividends owing to the testimony thus afforded of confidence in the maintenance of prosperous conditions on the part of railroad authorities.

The decline in prices restards on the ing 4 per cent rate. This action was no

conditions on the part of railroad authorities.

The decline in prices yesterday on the Illinois Central dividend was ascribed to the fact that the regular dividend was declared to be still 6 per cent, with the increase designated as extra dividend. But the similar reaction in Union Pacific today on the rise in the dividend rate emphasized the impression that buying in anticipation of dividend nereases has been completed. There was a demonstraton again in the Hill stocks on reiterated rumors of an extra distribution of assets on those stocks which were persistent in spite of the public denial of them by the head of those systems. The present market is so largely based on expectation of increased disbursement of profits that this condition of the speculation is deemed

Woodriver Mine is Now Marketing

a Car Every Other Day.

The returns from the two carloads of ore shipped to Salt Lake to test the market being fairly satisfactory. Mr. Ruthrauff will immediately begin regular shipments from his Dollarhide group of mines, says the Woodriver Times.

Beginning next week he will ship a caroad of crude ore to Salt Lake every other ay, and in a month or so expects to be bie to do even better. He is continuly adding to the force at the mines wroll, besides to ship to the force at the mines wroll at the total dividend increase late in the day intensified the impression that dividend increases have exhausted their day intensified the impression that dividend increases have exhausted their day intensified the impression that dividend increases have exhausted their day intensified the impression that dividend increases have exhausted their day intensified the impression
